

Extend desktop using Barco

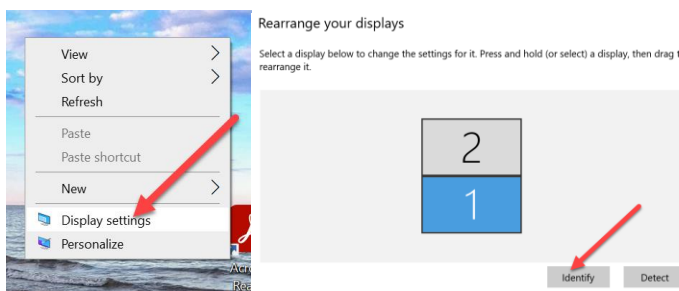

Plug Barco puck in like normal. Once the ring is solid white click small button on puck.

Once you click the small button a box will pop up. Select Extend Desktop. Then click to start share

From this point, you will now have two screens like at you work desk. You're going to want to set up screen orientation. Once you hit identify, large numbers will appear on the screen. Drag TV monitor to above the laptop.

This feature will allow you to have meeting on the TV and be able to use your laptop for meeting notes or other applications.
